ECO MANIAC are you?

NOW AVAILABLE: ECO inks optimized for printers utilizing Epson® DX4 print head technology.

Introducing Triangle ECO inks optimized for Epson® DX4 print head technology. Both color and chemically compatible to the OEM inks, Triangle ECO inks dual capability allows users to perform cartridge-by-cartridge changeover without wasting ink and without creating new color profiles to color match the OEM. The new ECO formula boasts low odor, fast dry times, HAPs and TAPs free, and significant cost savings compared to OEM Eco inks.

INX[®]...

DIGITAL

Whether you're printing wide or superwide format, the formula for success is simple: Deliver consistent, color quality. Turn jobs around fast. Avoid downtime and reduce costs.

Making the formula work, however, isn't so easy especially when you work with a variety of substrates. Add more printers, keep tabs on a growing inventory of costly ink cartridges and then wish for a service provider with cross-platform expertise who will respond to your needs now, not a few days from now.

Meet INX Digital International Co. a digital ink specialist and service provider with a major-league track record, deep resources and global connections.

INX Digital inks deliver a broader color gamut and better adhesion to more substrates. INX Digital works closely with digital print houses to assess ink color and performance issues, and develops products to work with various OEM equipment. And a proprietary dispersion system enables INX Digital inks to pack up to twice as much pigment into every drop vs. many other inks. Customers report a broader color gamut – cleaner, richer colors that they couldn't get before.

More than just ink. Application-savvy INX Digital people not only know digital inks, but also the nuances of different equipment – crucial know-how that helps operators achieve color quality and consistency, and get jobs out the door.

Rapid-response, total service-support. Money-saving bulk ink delivery systems.

Cross-platform support is a part of the INX Digital package as well. This includes equipment parts as well as specialists who can service virtually all printer makes and models. The more jobs you run and the more your digital business grows, the more you'll also appreciate the EasyFill PRO™ bulk ink delivery systems, designed to work with various OEM printers. You can cut costs by 2/3 or more vs. cartridges – savings that add up fast – while also avoiding frequent, annoying interruptions to replace cartridges.

It's all yours from INX Digital International Co. , in addition to advanced formula digital inks. See how we can help grow your digital business faster – and more profitably – for years to come. Contact us to find out more! www.INXdigital.com

NOT AVAILABLE

Product Availability

As a truly global company, INX Digital offers services and manufacturing with its operations located in the United States (USA), Italy, Czech Republic (EU), China (China) and India (India). All products included in this version of the catalog show availability per manufacturing location; represented by a green dot (in stock), yellow dot (special order), or red dot (not available).

Color Compatible

Look for our new Color Compatible logo on our new launches! Our Triangle Brand is now launching a series of Color Compatible products. We have set a new standard internally for Color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

Chemically Compatible

We are also looking to make your change-overs to Triangle branded products easy with Chemically Compatible products. We have developed a new series of tests to assure that our products are forward compatible (Our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

Reach

INX Digital has successfully completed a major portion of its strategic objectives for complying with REACH relative to the phase-in substance pre-registration period that has now expired. We have evaluated and accounted through extensive supply chain discussions the REACH level substances. There are multiple scenarios that can exist in this supply chain, and multiple solutions which we implemented to secure our product line portfolio for our customers.

2 Year Durability

Outdoor durability for the purpose of this statement is defined as no appreciable visual deterioration of the printed image when viewed from its intended viewing distance. These inks, TRIANGLE®'s premier outdoor durable inks designed to withstand outdoor exposure for up to two years, are backed by our original Worldwide Outdoor Durability Warranty for TRIANGLE® inks. See warranty for complete details.

1 Year Durability

Our one year durable product is intended for short term outdoor graphics and is expected to last up to one year depending on ambient conditions. To better match the needs of specific markets, certain TRIANGLE® inks are now available in a one year durability level. These inks are for use with outdoor graphics which will not be outdoors for more than one year.

3 Month Durability

Our three month durable product is intended for indoor and very short term outdoor use. To better match the needs of specific markets, certain TRIANGLE® inks are now available in a three month durability level. These inks are designed to last outdoors for no more than three months; perfect for regions that have outdoor graphics up for minimal periods of time before swapping out.

Delivering Technologies That Drive Digital Growth

Every year brings new and exciting advances in the digital industry—now more than ever with INX Digital, the global brand representing all of the digital resources through the Sakata INX worldwide network.

Integrated Printing Solutions

Success for digital operations calls for intimately understanding and effectively integrating technology for unique needs. Whether it be chemistry, hardware, software, engineering, or toner; this is our forte. Our global resource partners and experience in traditional as well as digital printing further equip our teams to help develop all aspects of your digital operation.

Sales & Service

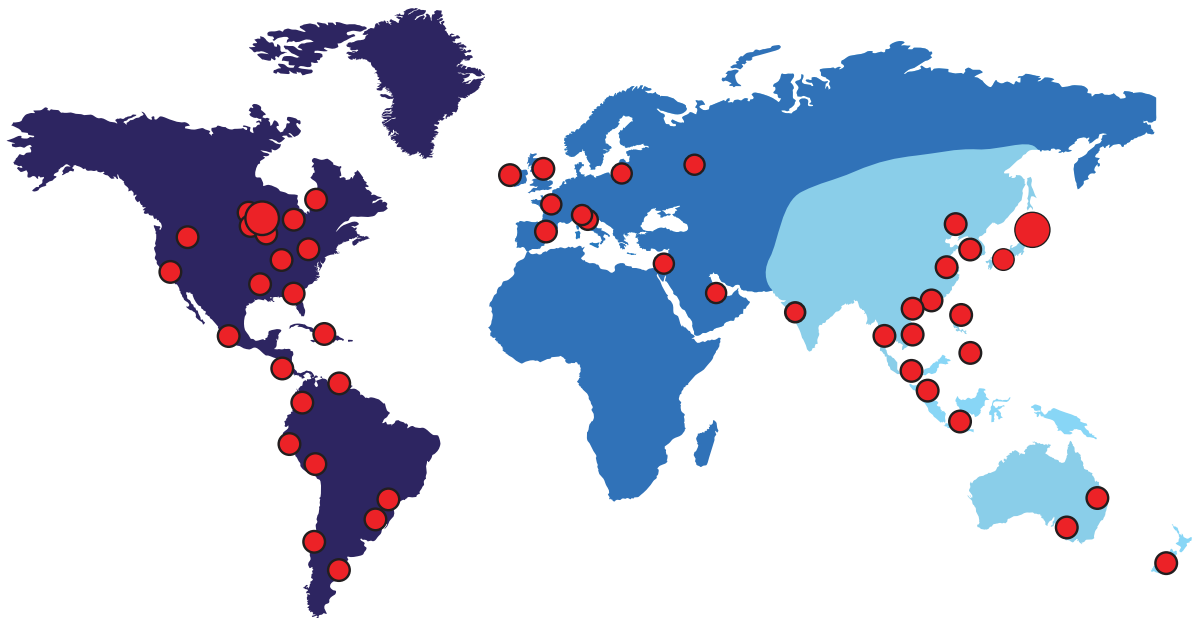

With a global sales force, including offices in the United States, we reach out to OEM companies as well as print shop owners. Our products are available across the world; backed by technical support and training.

Manufacturing

Manufacturing globally helps ensure our customers reduced costs and faster turnaround times. We continue to expand our current manufacturing capabilities; within our current facilities as well as with the addition of new.

Distribution Network

Marketing aftermarket inks through a global distribution network has created unmatched international recognition of our various brands. With toner, UV curable, solvent, mild solvent, bio, and eco inks as well as bulk ink delivery systems and printer hardware, we have a solution with a local support system near you.

PAPER PACKAGING

Multiple options for multiple demands.
There seems to be no limit to the range and extent of paper packaging challenges – substrates as well as brand color specs and unique converting demands. And as far as your customers are concerned, there's no room for compromise.

Every challenge meets its match with INX inks and coatings specially designed for each packaging application and process.

RIGID PACKAGING

Decorating the world.
The largest producer of inks for 2-piece metal decorating in the world, INX continues to stay a step ahead (or further) with new, advanced products and systems.

After all, "the package is the product" for cans coming off today's high-volume lines, and "almost" meeting color and brand identity specs won't do. A broad variety of product-differentiating metal package designs adds to the challenge of delivering inks with eye-popping color plus properties to withstand the rigors of fabrication, filling & distribution.

Our products and expertise in plastics is gaining import, too, as more marketers add plastic containers to their packaging portfolio.

FLEXIBLE PACKAGING

Helping you grow with growing trends.
"High performance" is the name of the game as shrink sleeve labels, retort pouches, boil-in-bag and other flexible packaging continues to gain share with consumers and marketers alike.

Multiple-substrate INX options deliver "the brand look" with eye-popping color while reducing color pulls and waste. Our inks, laminates and coatings also simplify inventory in gravure as well as flexo operations.

COMMERCIAL PRINTING

Simplifying quality output across-the-board.
The diversity and extent of print vehicles continues to challenge commercial and publication printers. And there's little or no leeway when brand identity is at stake and "the printed piece" is critical to drawing potential buyers' interest and action.

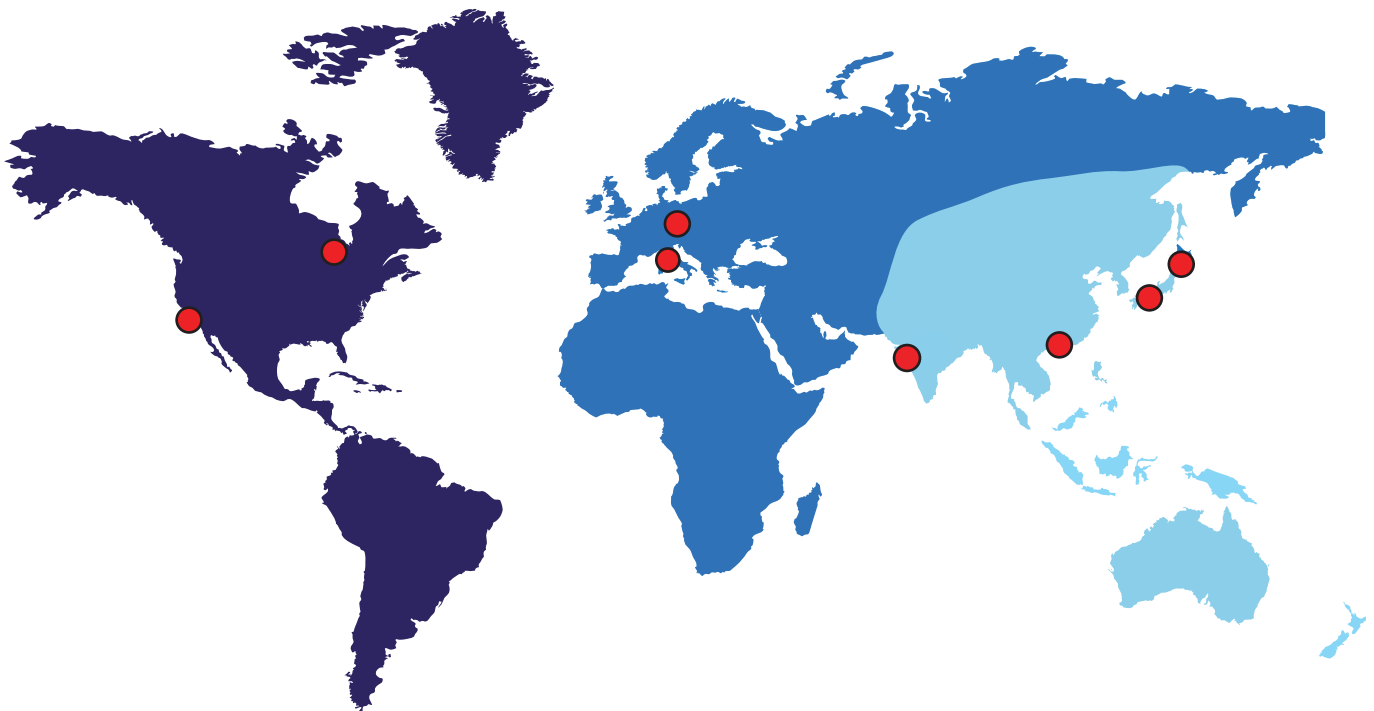

INX continues to lead the way with solutions that deliver crucial output quality, cost-efficiently. This includes exclusive, proprietary ink technology unmatched in the industry, along with ongoing INX Team assistance and technical support for each application and print process.

Every year...

...brings new and exciting advances in the digital industry – now more than ever with INX Digital, the global brand representing all of our digital resources and part of the Sakata INX worldwide network.

Delivering the technologies that drive digital growth.

We provide a full palette of digital ink systems, application and technology integration services, including:

- Chemistry : Inkjet ink systems, electrophoretic toners, OEM ink development
- Hardware: application-specific electronics and equipment
- Software: develop, install, validate
- Engineering: total-system integration expertise

Transforming complementary facets into a productive, profitable entity.

Success for digital operations, however, calls for intimately understanding and effectively integrating technology for your unique needs.

This is INX Digital's forte.

Our global resource partners and experience in traditional as well as digital printing further equip INX Digital teams to help develop all aspects of your digital operation.

Global partnering provides local answers.

INX Digital continues to lead the way with new, advanced inks to match virtually every OEM printer and print head type. With an unsurpassed Global Dealer Network offering full technical

training and local technical support to all customers, INX Digital defines "value added."

Equipment & system integration expertise.

INX Digital is at the forefront of parts and printer engineering. Bulk ink delivery systems and electronic work around chip solutions for the Wide Format market as well as design and engineering of the UV LED Narrow Web printer (NW Series) and the UV LED cylindrical printer (CP Series) are proof of innovation and ingenuity.

INX Digital integration expertise incorporates extraordinary electronics, software development, mechanical design and engineering capabilities to meet unique equipment and system requirements.

All this and more is at your fingertips with INX Digital. Let INX Digital help make 2010 our most productive and profitable year yet!

INX Digital: All systems go.

Reduce, Reuse, Recycle

INX Digital is Green

Environmental protection is a priority for the conservation of precious natural resources and the continued health of our planet. INX Digital recognizes its responsibility as a global citizen and is continually striving to reduce the environmental impact of the work we do and the products we create.

INX Digital and the Global Environment

INX Digital takes pride in its history of innovation and thoughtful design. But technological leadership goes beyond what's in our products. How we impact the environment is also important to us, and environmental considerations are an integral part of INX Digital's business practices. From the earliest stages of product design through manufacturing, use, and recycling, we take care to keep our activities and our products environmentally sound. Four areas of particular attention are product and packaging design, responsible manufacturing, energy efficiency, and recycling. Each aspect of the design cycle provides significant challenges, yet our efforts in these areas have resulted in some impressive results.

Product and Packaging Design

It all begins here. Reducing the environmental impact of our products starts with the product design. Design dictates the quantity of raw materials, type and recyclability of materials, methods for manufacturing and use, and the ease of recycling or disposing.

BioINX Product Design

INX Digital's Bio line utilizes renewable resource content. Reducing our reliability on non renewable resources such as crude based products drives our business towards sustainability. We believe that constantly driving towards more sustainable business practices and sustainable products is not only important but part of our moral responsibility. Our Bio line utilizes a corn based raw material Ethyl Lactate. It is also extremely important for the environment for products to have a long useful life and to meet customer demands for their end uses. Our Bio line carefully balances the long term needs and stability of the product while maximizing sustainability.

Shades of Green

Shades of Green is a concept that we developed at INX Digital where we look at constant improvement. We believe that one does not suddenly "become Green" but rather that you must constantly strive toward reducing ones impact on the environment. One must constantly become greener.

greenINX.com

Research & Development

True

Our TRIANGLE® Brand of True Solvent inks are formulated as industrial, cost effective production inks. This line of inks are vinyl polymer based with a high solubility solvent system allowing the ink to penetrate into the substrate creating unparalleled adhesion and durability. They are formulated with commodity solvents with good price structure. We have developed, XJS800, our own specialized pigment dispersion technology designed around automotive pigments. These nanoparticle Sub micron pigments are automotive grade and encapsulated in customized polymers for incredibly reliable and stable formulations. These inks are specially formulated for fast dry times yet enough open time to not cause surface cure in the nozzle orifice. We are known for our bright yellow, strong cyan wide gamut magenta and jet 4 color blacks.

Eco

Our TRIANGLE® Brand of Eco Solvent inks are formulated with special attention to Environmental impact, Human health and safety, and regulatory concerns. INX Digital has set the standard on Eco inks. We have internally set criteria that we grade every ECO ink. These criteria include odor, Hazardous Air Pollutants, Reproductive toxicity, non mutagenic, VOC, Environmental Fate, OSHA Threshold limits. TRIANGLE® Brand of Eco Solvent inks have extremely low odor. We use our internally designed XJS950 Dispersion Line which has a particularly narrow particle size distribution. This consistency of particle shape and size allows consistent drop formation and a reliable meniscus reaction. The custom Polymers designed for Our ECO line is carefully made and classified to have a narrow molecular weight distribution. The Solvent mixture was carefully balanced to optimize polymer solvency creating a high level of formulation stability.

Bio

Our TRIANGLE® Brand of Bio products utilizes renewable resource content. Reducing our reliability on non renewable resources such as crude based products drives our business towards sustainability. We believe that constantly driving towards more sustainable business practices and sustainable products is not only important but part of our moral responsibility. It is also extremely important for the environment for products to have a long useful life and to meet customer demands for their end uses. Triangle's Bio product line carefully balances the long term needs and stability of the product while maximizing sustainability.

Mild

Our TRIANGLE® Brand of Mild Solvent products are Cyclohexanone free, reduced odor yet have a solvency package that still allows for the use of vinyl copolymers which give excellent outdoor durability, scratch resistance and alcohol resistance. These Mild Solvent inks have excellent adhesion characteristics to a wide variety of media and generally have a fast dry rate.

Water based

Our TRIANGLE® Brand of water-based inks are dye or pigment based and designed for use on receptive media with a micro-porous surface that is highly absorbent of the ink. Although dye based inks result in brighter, more vibrant colors, pigmented inks offer a greater resistance to UV light translating to greater resistance to fading when exposed to sunlight. Most water-based inkjet inks are not waterproof, making a treatment with a laminate or other protective coating necessary.

UV

Our TRIANGLE® Brand of UV Curable products are formulated to meet a variety of machine specific applications. These industrial, production inks use our internally designed XJS350 Dispersion Line which boasts strong, bright, vivid colors. Additionally these automotive grade pigments have excellent color fastness (outdoor fade resistance) and a particularly narrow particle size distribution. The small particle size aids in ultimate up time for your printer with consistent drop formation and fewer dropouts caused by air entrapment in the piezo channel. We utilize a variety of monomers as well as integrate unique polymer technology which gives the TRIANGLE® Brand of product unique performance on a wide variety of media.

**Stop the waste.
Keep the quality.
Choose Triangle!**

The Triangle Logo is a registered trademark of Triangle Coatings, Inc. used under license.

Leading the way with new, advanced inks to match virtually every OEM printer and print head type, an unsurpassed Global Dealer Network offering full technical training and local technical support to all customers, INX Digital redefines "value added." Whether you are looking for UV curable, solvent, or mild solvent inks, bulk ink delivery systems, liquid laminates, or printer hardware, INX Digital has a MONEY SAVING solution to fit your needs.

INXDigital.com

Ink Train Warranty

INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*

*See warranty disclosure statement for details.

Outdoor Durability Warranty

INX Digital backs their 2 year products with their Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*

*See specific product durability warranty as some vary.

Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

Color Center

INX Digital provides custom profiles to our customers. Every print shop is unique in their set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers various needs For additional info:

techsupport.global@INXdigital.com

Tech Support

Have any questions or issues that need to be resolved? We respond to all inquiries within 48 hours. For additional info:

techsupport.global@INXdigital.com

Spare Parts

INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems. For additional info: techsupport.global@INXdigital.com.

Color Compatible

Look for our new Color Compatible logo on our new launches! Our TRIANGLE® Brand is now launching a series of Color Compatible products. We have set a new standard internally for Color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE® wide format line to meet your need. This is in addition to being able to choose your chemical technology such as Bio, Eco or true solvent.

Chemically Compatible

We are also looking to make your change-overs to TRIANGLE® branded products easy with Chemically Compatible products. We have developed a new series of tests to assure that our products are forward compatible (Our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks. .

Easyreset

EasyReset is an automatic chip-emulation system, that replaces OEM chips. Every time you start the printer it generates a new code that takes the Virtual Ink level to 100% (440 ml per cartridge). Each time you need to replace a cartridge, following the printer User Manual, the Virtual Ink value has to be restored to 100%. To do that, you need to restart your printer. When the machine is restarted the Virtual Ink value will be back to 100%.

ECOBK.JV33.PLUS ●●●●

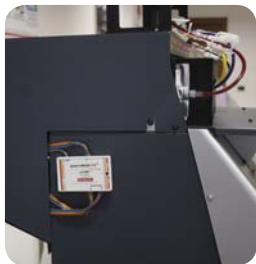

(To be used with Resetter)

Easyreset

EasyResetV3 is an automatic chip-emulation system, that replaces OEM chips. EasyResetV3 works generating a new serial code every time your printer will be rebooted. Every time you start the printer, EasyResetV3 generates a code that takes the Virtual Ink to 100% giving the virtual value of 9 per color (see chip levels in the printer control panel or user manual). Each time you will need to replace an empty cartridge, the Virtual Ink value has to be restored at 100%. To do that, you simply need to press the reset button.

ENVIRONMENTALLY RESPONSIBLE NANO DISPERED DYE DIGITAL INKS FOR DIRECT TO TEXTILE PRINTING

TRIANGLE® water based textile inks DTX are designed for digital printers utilizing piezo print head technology. These inks are intended for direct to textile printing, on polyester or mixed synthetic fabrics that contain a minimum of 60% polyester. In the direct to textile printing method, images are printed directly onto the fabric and are subsequently put through a process of thermo-fixation. With our textile inks you will see:

- Vibrant colors
- Long shelf life
- Optimal jetability
- Superior image definition
- Excellent fastness properties

APPLICATION

The market that we have focused on for the DTX textile inks is flag and banner. These TRIANGLE® inks will perform optimally when printing direct to polyester banners and flags on treated fabrics.

THERMOFIXING CONDITIONS

Thermo-fixing can occur by means of a press or a calendar. The temperature and time for thermo-fixing varies depending on the chemical-physical characteristics of the substrate being printed.

COLOR	TEMPERATURE/HEAT SETTING	DURABILITY*	
		UV LIGHT	WASHING
Cyan	170° C - 210° C	5/6	4/5
Magenta	170° C - 210° C	6/7	5
Yellow	170° C - 210° C	6/7	4/5
Black	170° C - 210° C	6	5
Light Cyan	170° C - 210° C	5/6	4/5
Light Magenta	170° C - 210° C	6/7	5

*Durability is based on a scale of 1-8.

NOTE: This information has been carefully studied from experience gained in the laboratory and under commercial situations. It is subject to change without notice. All sales are subject to our standard terms and conditions of sale. Since applications for this product vary tremendously, the user assumes the obligation to test this product in their specific situation to determine its suitability and assumes all risk and liability related to such use. In no event shall INX Digital be liable for damages in excess of the original cost of the product nor shall INX Digital be liable for any special or consequential damages.

Need to clean?

INX Digital is employing a new, patent-pending technology, proving that up to 100% recovery on Solvent print heads with obstructed nozzles and restricted flow is possible. This advance in print head cleaning, available for virtually all print head types, translates to major savings for digital print operations.

Ink Train Warranty

INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*

*See warranty disclosure statement for details.

Outdoor Durability Warranty

INX Digital backs their 2 year products with their Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*

*See specific product durability warranty as some vary.

Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

Color Center

INX Digital provides custom profiles to our customers at no charge. Every print shop is unique in their set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers various needs. For additional info: techsupport.global@INXdigital.com

Tech Support

Have any questions or issues that need to be resolved? We respond to all inquiries within 48 hours. For additional info: techsupport.global@INXdigital.com

Spare Parts

INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems. For additional info: techsupport.global@INXdigital.com.

Color Compatible

Look for our new Color Compatible logo on our new launches! Our TRIANGLE® Brand is now launching a series of Color Compatible products. We have set a new standard internally for Color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE® wide format line to meet your need. This is in addition to being able to choose your chemical technology such as Bio, Eco or true solvent.

Chemically Compatible

We are also looking to make your change-overs to TRIANGLE® branded products easy with Chemically Compatible products. We have developed a new series of tests to assure that our products are forward compatible (Our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks. .

TBO (111) – HD – High Density solvent ink for the Turbojet was designed to give long lasting outdoor UV protection by design. This Magenta will still give a deep rich series of reds and oranges as well as blues. When looking for fade resistance for car wraps you should suggest for your clients to use this Magenta.

TBO (112) – HC – High Chroma solvent ink for Turbojet is designed to provide the largest color gamut. By using HC magenta end-users will get rich reds, brilliant pinks, oranges and bright Blues even on low cost paper stock. Short term paper prints and/or billboards will have an even greater impact when printing with our HC ink.

Liquid Laminates

What are Liquid Laminates

TRIANGLE® Liquid Laminates are a series of products from INX Digital designed specifically to protect prints from UV light and other environmental effects. There are solvent-based and aqueous-based products to protect respectively water-based and solvent-based prints. TRIANGLE® Liquid Laminates are of the highest quality, giving your prints the best protection.

Why Liquid Laminates

TRIANGLE® Laminates protect digitally produced images from abrasion, water, and premature fading while maintaining the flexibility and elasticity of the media; they are weldable. They also “pop” the colors, giving a wet look to the print. While providing these features TRIANGLE® Liquid Laminates also maintain a lower cost per square meter in comparison to hard laminates.

UV Protection

TRIANGLE® has set new higher standards in quality with their Liquid Laminates: blocking 99% of light by utilizing current “state-of-the art” methods in UV protection; UVA UltraViolet Absorber and HALS- Hindered Amine Light Stabilizers. When used in accordance with TRIANGLE® inks, your print job’s lifetime will be extended.

How to apply Liquid Lamintes

TRIANGLE® Liquid Laminates can be applied using various methods dependant on the type of coating and substrate being utilized: automated coaters, brushing, rolling, or spraying are all viable options. To obtain optimal protection, it is recommended to apply the specified required amount of coating to the substrate (specific to product type). Follow the product applications instruction for best results. Always test before use.

TRUCKSIDE, FLEET GRAPHICS, VEHICLE WRAPS

ClearFlex ME Aqueous Based Liquid Laminate for Truck side, Fleet, and Vehicle Graphics

- ▼ Extremely durable
- ▼ Formulated for truck side and fleet graphics
- ▼ Minimizes dirt pickup
- ▼ Minimizes the effect of UV light transmission
- ▼ Minimizes the effect of oxidation, moisture, and temperature
- ▼ High abrasion resistance

Order Codes

FINE ART REPRODUCTION

ULTRA Solvent Based Liquid Laminate for digital fine art

- ▼ Extremely durable
- ▼ Formulated to protect water sensitive inkjet prints on canvas (giclées)
- ▼ Minimizes the effect of UV light transmission
- ▼ Minimizes the effect of oxidation, moisture, and temperature
- ▼ Reduce occurrences of cracking and peeling
- ▼ High abrasion resistance
- ▼ Compatible with flexible vinyl, photographic media, self-adhesive vinyl, and some papers.

 1291744-05LT	5 lt Bottle D413 Semigloss

FLATBED UV CURABLE PROTECTION

Cristal Bond Aqueous Based Liquid Laminate for protection on UV curable prints

- ▼ Formulated for adhering to and protecting UV curable inks
- ▼ Virtually eliminates directional banding (lawnmower effect)
- ▼ Minimizes the effect of UV light transmission
- ▼ Minimizes the effects of oxidation, moisture, and temperature
- ▼ High abrasion resistance

KCV.2

Valves for Mutoh @ dummy cartridges and tube connection gasket included

CPNGM

Solvent resistant capping for Mutoh @

WPP

Wiper for Mutoh@ solvent resistant.

SRS

Solvent resistant syringe (w/o rubber)

EFRF

Round filter for easyfill luer lock fitting included

SOLPH

Solvent resistant print head for Mutoh @

UPH2

Upper head solvent resistant for Mutoh@ p/heads

WIP30

Fabric wiper to clean printers parts

DMPWIDE

Damper screen "Wide" solvent resistant for Mutoh@

DMPEPS

Damper solvent resistant for Mutoh@

DMPBIG.3

Damper "Big" solvent resistant for Mutoh@ 3 mm in let tubing

DMPBIG.4

Damper "Big" solvent resistant for Mutoh@ 4 mm in let tubing

CAP

Capping adaptor to be used for Flushing Mutoh@ capping unit

PPTS

Micro pipettes for printer maintenance (nozzle wash)

MMPMP.2

Pump for Mutoh @ solvent resistant

CPK

Capping cleaning kit for Mutoh@ printers

RLS32

Solvent resistant tube semi-rigid ID mm 2 OD mm 3 (diameter that fit into the Dumeper)

RLS427

Solvent resistant tube semi-rigid ID mm 2,7 OD mm 4

TYG2X4

Solvent resistant tube soft-tube ID mm2 OD mm4 - For use in peristaltic pump

SWAB. I

Solvent resistant SWABS to clean printers parts in contact with inks (for printing cleaning procedures)

ECTG

Solvent resistant empty cartridge, only plastic with chip location (for Dummy Cartridges)

PMPK

Pump connection kit to easy connect pumps.

CTCN

Solvent resistant connection for empty cartridge valve and gasket included (for Dummy Cartridges)

EF-FNN

Funnels for easyfill PRO

ESUKA

New Battery device to suck and Spray flush

MMCLK

Keep your printer clean and running 100% of the time
Mutoh® Monthly Cleaning Kit
(10 swabs, 20wipes, cpk, 10 wiper, 4 pipette)

KCV.2

Valves for VJ 1604® dummy cartridges and tube connection gasket included

JVV.CHEAD

Solvent resistant print head for VJ 1604®

JVV.WIP

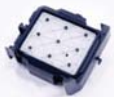

Upper head solvent resistant for VJ 1604® p/heads

SRS

Solvent resistant syringe

JVV.CP

Solvent resistant capping for VJ 1604®

CAPJ33

Capping adaptor to be used for Flushing VJ 1604® capping unit

JVV.CON.KIT

Solvent resistant connection for empty cartridge valve and gasket included (for Dummy Cartridges)

WIP30

Fabric wiper to clean printers parts

JVV.CPK

Capping cleaning kit for VJ 1604® printers

CTCN

Solvent resistant connection for empty cartridge valve and gasket included (for Dummy Cartridges)

DMPBIG.4

Damper for VJ 1604 (not suitable for VJ 1614)

PMPK

Pump connection kit to easy connect pumps.

PPTS

Micro pipettes for printer maintenance (nozzle wash)

SWAB.1

Solvent resistant SWABS to clean printers parts in contact with inks (for printing cleaning procedures)

ESUKA

New Battery device to suck and Spray flush

MVJMCLK

Keep your printer clean and running 100% of the time
Mutoh Valuejet Monthly Cleaning Kit
(10 swabs, 20wipes, cpk, 10 wiper, 4 pipette)

HP®

DesignJet™ 8000, 9000, 10000,
Seiko® ColorPainter™

SCPCPNG

Solvent resistant capping for Seiko @ ColorPainter™

SCPWIP

Wiper for Seiko@ ColorPainter™ solvent resistant.

SCPSPO

Sponge for Seiko@ ColorPainter™ solvent resistant.

WIP30

Fabric wiper to clean printers parts

EFRF

Round filler for easyfill luer lock fitting included

SCPCK

Seiko @ ColorPainter™ chip Kit to extract contacts for external connection of chip

SRS

Solvent resistant syringe

CAPSCP

Capping adaptor to be used for Flushing Seiko@ ColorPainter™ capping unit

SCP.CPK

Capping cleaning kit for Seiko@ ColorPainter™ printers

DMPSCP64

Seiko @ ColorPainter™ 645 Dumper

DMPSCP100

Seiko @ ColorPainter™ 1005 Dumper

SWAB.I

Solvent resistant SWABS to clean printers parts in contact with inks (for printing cleaning procedures)

TYG4X6

Solvent resistant tube soft-tube ID mm4 OD mm6 - For use in peristaltic pump (Seiko @ ColorPainter™ 64)

TYG06

Solvent resistant tube soft-tube ID 1/8" OD 1/4"

EF-FNN

Funnels for easyfill PRO

PPTS

Micro pipettes for printer maintenance (nozzle wash)

ESUKA

New Battery device to suck and Spray flush

7387

Seiko/HP Pump Assembly

SCPMCLK

Keep your printer clean and running 100% of the time

Seiko@ Monthly Monthly Cleaning Kit
(10 swabs, 20wipes, cpk, 10 wiper, 4 pipette)

Technical Service & Support

Rapid-response, service-support. Cross-platform support is a part of the INX Digital package. This includes equipment parts as well as specialists who can service many printer makes and models. With an unsurpassed Global Dealer Network offering full technical training and local technical support to customers, INX Digital redefines “value added.” INX Digital has broken down its main support system into four segments: Field Service, Head Cleaning, Color Management, and Printer Conversions.

INK CONVERSIONS

Onsite technician to perform ink conversion to TRIANGLE® brand ink. This process includes benchmarking the printer prior to the ink conversion and removal of old ink, installation of TRIANGLE® ink and post-conversion proof prints. The ink train preparation will include a filter change and flushing of integral components to optimize installation of TRIANGLE® ink. The conversion may also include light maintenance and mechanical adjustments if needed. The conversion process requires a minimum 2-day onsite technical visit by a qualified/authorized TRIANGLE® technician.

Order Codes Americas	Order Codes EMEA	Service Description	   
I 8000FSDR	I 8900FSDR	Field service daily rate	
I 8000FSST	I 8900FSST	Field service straight time (hourly)	
I 8000FOT	I 8900FOT	Field service overtime	
I 8000FSDT	I 8900FSDT	Field service double-time	
I 8000TE	I 8900TE	Travel expenses	

HEAD CLEANING

INX Digital is employing a new, patent-pending cleaning technology, offering an effective solution for solvent and UV curable print heads with obstructed nozzles and restricted flow. This advance in print head cleaning, available for virtually all print head types, translates to major savings for digital print operations. This service is designed for industrial print heads such as: Dimatix® (formally Spectra®), Xaar® 1001™, Ricoh®, Konica Minolta®, T-tec™, Kyocera®, and Jettron® GT64™. This service is not suitable for disposable type print heads such as Xaar® 128/126™ and Epson®. For more information on our print head cleaning services please email: printheadcleaning@INXdigital.com.

I 8000PH-NT	I 8900PH-NT	Print Head Cleaning non-TRIANGLE® ink	
I 8000PHUV	I 8900PHUV	Print Head Cleaning UV TRIANGLE® ink	
I 8000PHUV-NT	I 8900PHUV-NT	Print Head Cleaning UV non-TRIANGLE® ink	

COLOR MANAGEMENT

More than just ink. INX Digital continues to strive to meet the demands of the market when formulating our TRIANGLE® inks. In some cases color compatibility is a must whereas in other situations formulas with greater color gamut compared to the OEM's are requested. Application-savvy INX Digital people not only know digital inks, but also the nuances of different equipment—crucial know-how that helps operators achieve color quality and consistency, and get jobs out the door. Our technicians are happy to provide assistance with ICC profile generation, creation of custom color profiles, or even provide a full color management training program for large printing operations.

Color Profiling

Order Codes Americas	Order Codes EMEA	Service Description
I8000CPID	I8900CPID	ICC Profile Generation (IDI)
I8000CP05	I8900CP05	Custom Color Profile (on site)

3 Day Color Management Training Program

We offer a three day training program that is designed to provide digital print customers with the fundamentals required to drive their workflow more efficiently. In this 3 day course, customers will receive basic training on printer calibration, color management strategy, and expectation management. Basic program includes:

- ▼ 2.0 day printer calibration and characterization
 - 2 production machines
 - 2 medias each (total of 4)
- ▼ 0.5 day workflow and color management strategy
 - Color Management in Adobe Creative Suite
 - Evaluating color on the display
 - Understanding Color Management Fundamentals
- ▼ 0.5 day expectation management
 - Communicating color internally (prepress to production)
 - Communicating color to your customers (delivery)
 - Communicating color to your customers (sales)

2 Day Color Management Training Program

More complex sites (multiple printer brands and RIP's) might require extra days to offer assistance in locking down the color process, standardization and managing production variables. We offer the following extras beyond the basic program:

- ▼ 1.0 day additional production printer
 - 2 medias included
- ▼ 1.0 day production support
 - Provides consultation services and troubleshooting for live work
- ▼ Expert Support Line
 - Annual phone/WebEx support

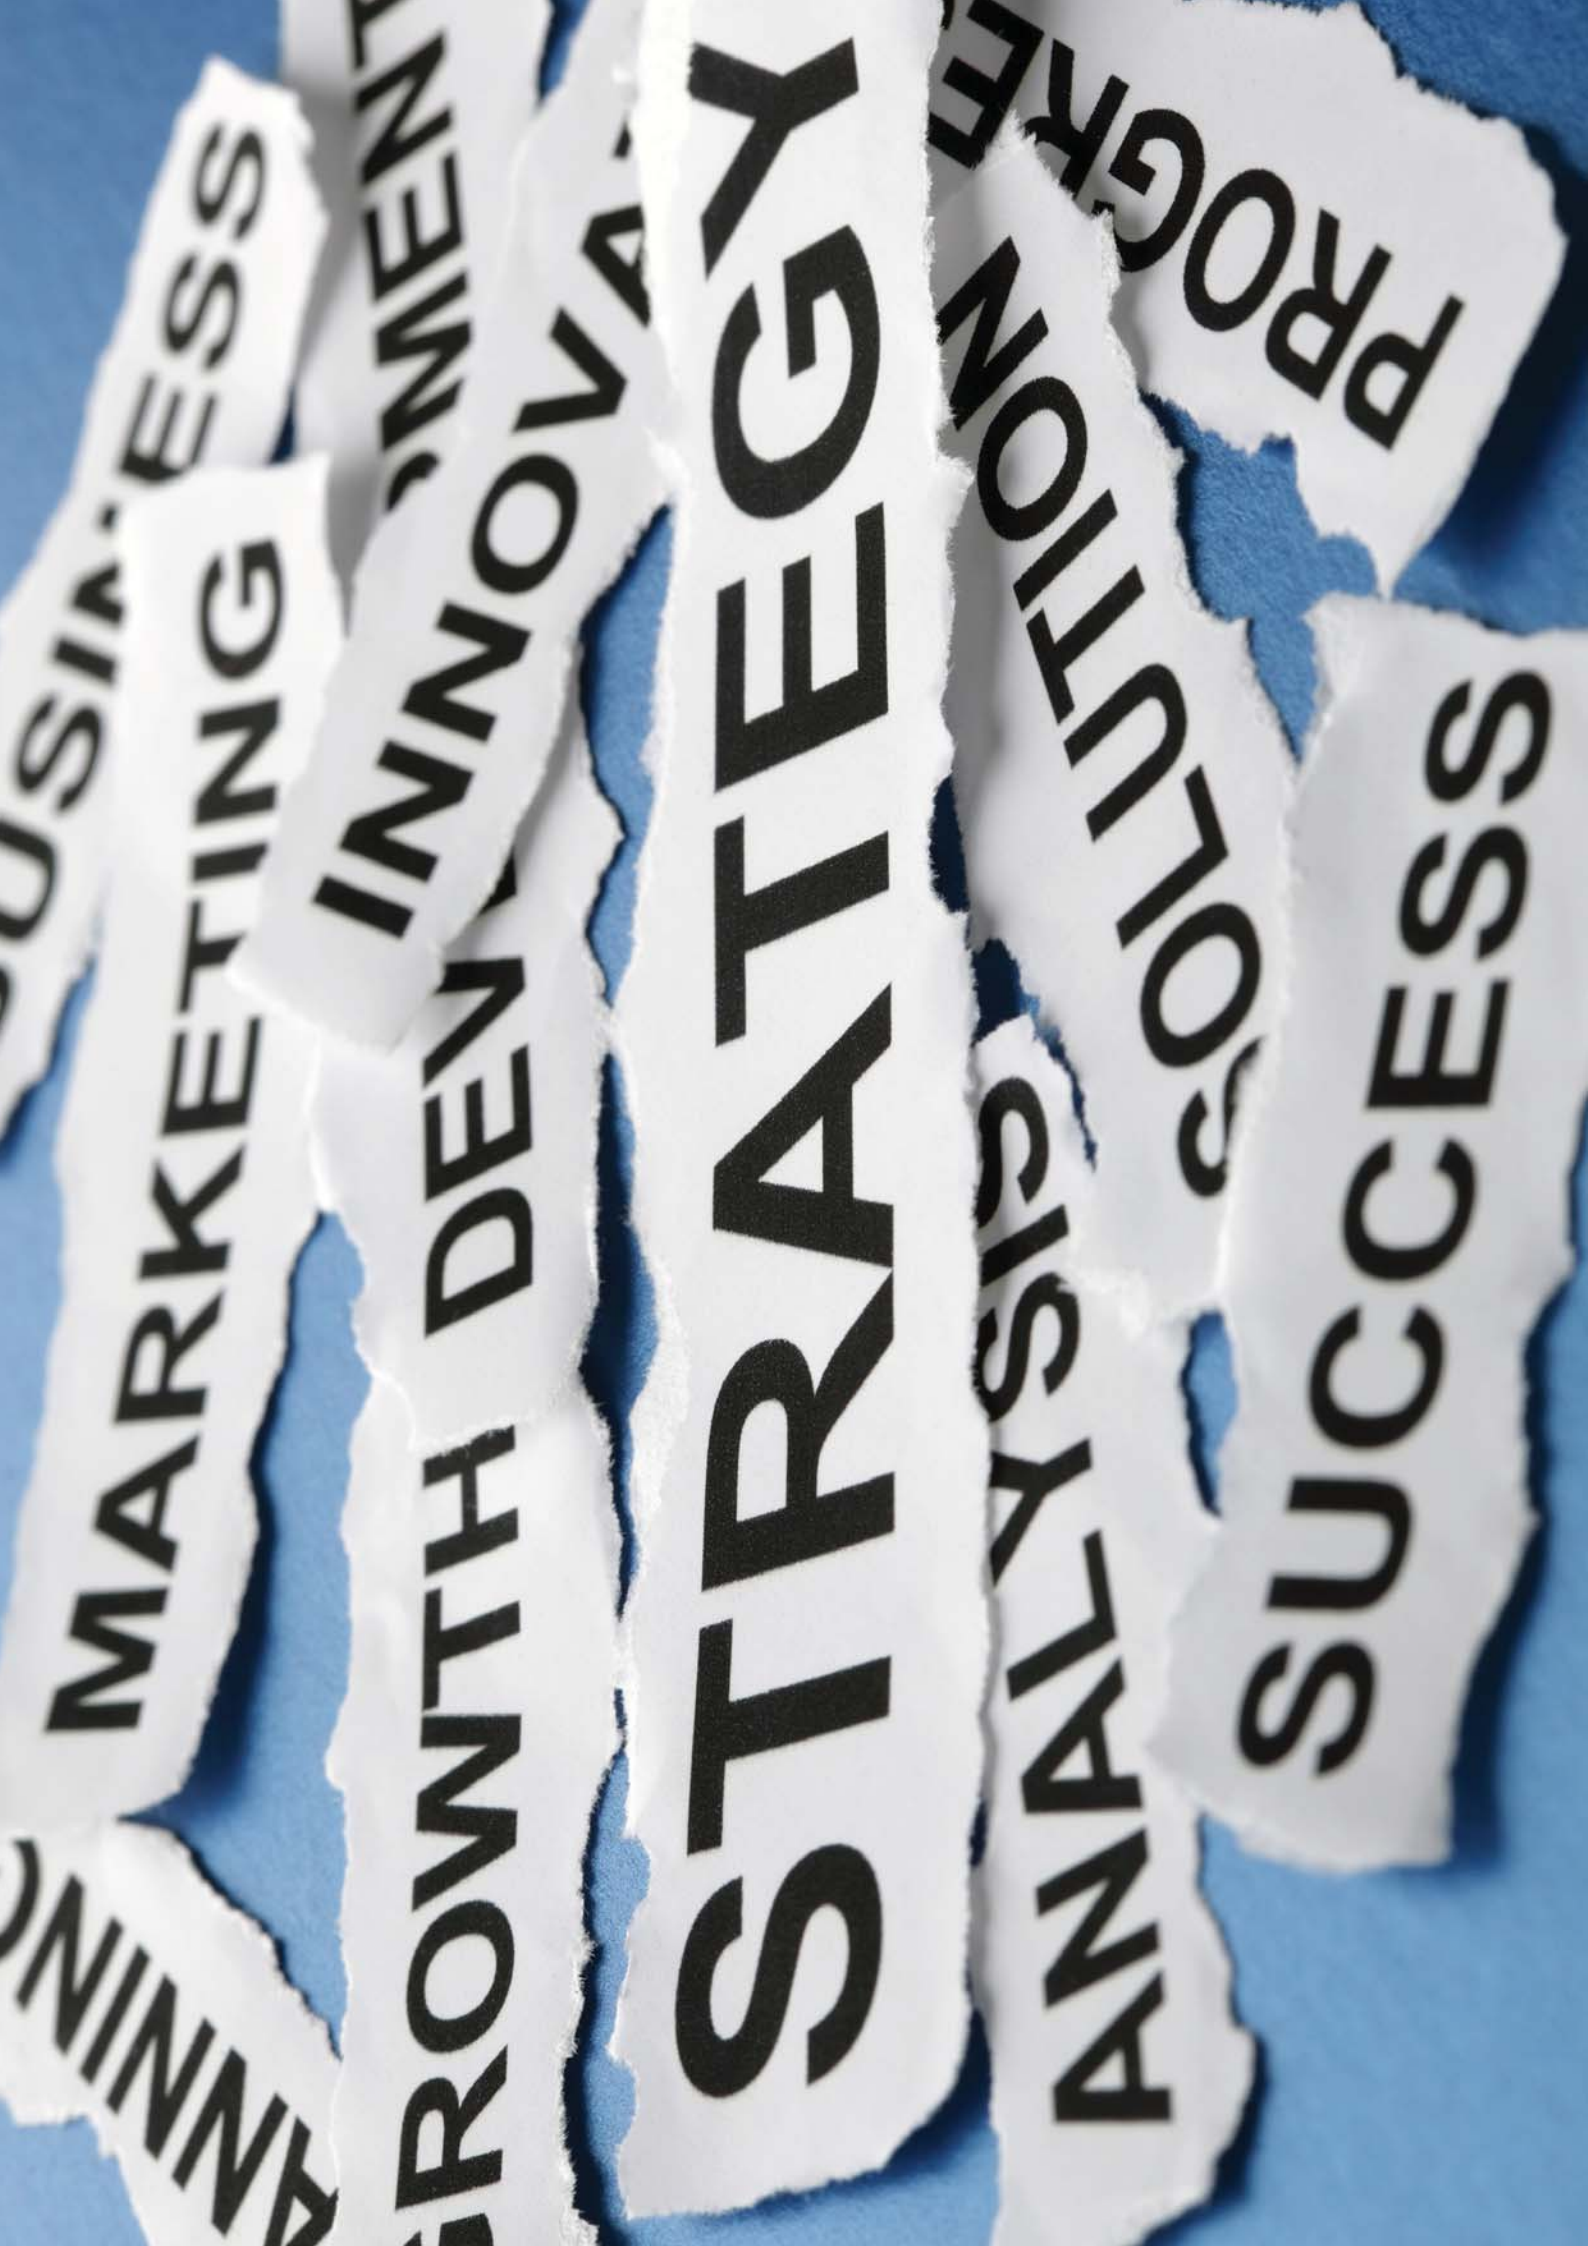

*This program requires a pre-qualification process, including preliminary interview and evaluation of print conditions through basic test files. Requires 2 weeks advanced notice. Requested travel within 2 weeks may be subject to a rush charge of \$800.

7768	7768	On-site service	
7765	7765	On-site expenses	
7796	7796	Phone support (1 year contract)	

FIELD SERVICE

Onsite technician to perform preventative maintenance or repair service on printers currently installed with TRIANGLE® ink. Technician to evaluate printer condition and then identify and perform required service. Field service technicians have access to INX Digital's extensive Parts Program which can be purchased separately.

Marketing

Need marketing collateral or design work? We can help! The INX Digital Global Marketing Team works together to create ad campaigns, product literature (data sheets and sell sheets), electronic advertisements, newsletters, email blasts and more to promote our TRIANGLE® brand as well as specific product messages. There are many types of collateral we produce that could easily be put to use within your own company's marketing strategies, whether you keep everything the same or make simple modifications. For more information on ways our team can help yours, please email: IDMarketing@INXdigital.com.

Print Advertisements:

Interested in using one of our ads? We are happy to replace our contact information and website address with your own details and provide electronically!

Electronic Advertisements:

Did you like something you saw from us that came through electronically that you want to use? Ask! We can quickly and easily change the contact information and website address with your own details and provide electronically!

Product Literature:

Need data/sell sheets for an upcoming event or to send out via email to potential customers? Register with smartINX.com and get access to all of our TRIANGLE® sell sheets for the entire product line! Need them customized with your company's contact details and logo? No problem, we can help you with that!

Tradeshows:

Are you participating in an upcoming tradeshow that includes TRIANGLE® products as a highlight of your exhibit? We can offer assistance with your planning!

- Booth design
- Banner/Graphic design
- Labeled, empty display bottles
- Tradeshow bags
- Logo'd pens

Sample Prints:

Need printed samples from a specific printer using TRIANGLE® inks to show prospective clients? We can help you with this! Our marketing group is happy to help coordinate printed samples with our applications lab.

HTML Newsletter:

Looking for a fast and effective way to reach lots of customers at a low cost? Let us help you customize one of our newsletter templates so you can get the word out about TRIANGLE® products!
